

Tips to Help Enjoy Retirement

Hopefully you're not too worried about retirement life, but if you do have some concerns about making your money last, here are 3 ways you can make sure you'll be able to enjoy being retired.

Wait as long as possible on social security.

While you are eligible for social security at age 62, you will receive more benefits if you wait until age 66 and even more at age 70. Holding out as long as possible can definitely have some advantages.

Plan ahead.

The magic number for withdrawing your retirement savings has long been 4% annually. The best plan of action would be to speak with a financial advisor and determine what amount works for you, create a budget, and stick to it.

Consider a part-time job.

Supplementing your income in retirement is a great way to make your money go further. Not only would this help financially, it will also get you out of the house and help fill some spare time.
